1. Model 4155 Direct reading frequency meter are absorption type frequency meter to give direct frequency on the dial provided. These are recommended for the use whenever quick determination of frequency and easy readings are desired in laboratory Synerand production testing rgy Telecom (P) Ltd Synergy Telecom (P) Ltd Synergy Telecom (P) Ltd

2. These consists of a section of waveguide connected to a tunable resonant cavity of high Q. The cavity absorbs some power at resonant frequency. These are designed to have 5

Syner MHz resolution and off-resonance VSWR of 1.01: Telecom (P) Ltd Synergy Telecom (P) Ltd
