Mechanical Turn Table Model 851 consists of M.S.Round plate supported by four adjustable screws.

On top of this plate one fixed arm and another rotatable arm with 0-360° angular-marked dial is fitted. Rotatable arm has three extendable rods with a trolley which has two stands to hold the Ltd receiving antenna and detector. Fixed arm also has two stands to hold the transmitting antenna with source. This turn table can be used to plot the radiation pattern of antenna.

Synergy Telecom (P) Ltd Synergy Telecom (P) Ltd Synergy Telecom (P) Ltd Please note that Microwave Source, Detector-Mount, VSWR Meter, Isolator, Frequency Meter should be ordered separately.
