

Synergy Telecom P Ltd.

100 pair 110 rack-mounted patch panel

Detailed Product Description

100 pair 110 rack-mounted patch panel

1.ROHS certificate

2.Meet the ANSI / EIA 568A standard

Summary:

1. 110 patch panel is 110 type connection management system,
2. 110 patch panel is flame retardant, plastic injection molding to do the basic devices, cabling system, cable on the termination on it.
3. He accessories 4 pair, 5 pairs of connected modules, white label, tag folder.
4. Efficient use of pluggable jumper, you can simply rearrangement, The non-professional technical person could operate easily.

Features:

1. With 4 right, 5 on the module card access, convenient operation, frame body for the frame, spray, the color is black.

■

2.IDC contact reed use phosphor bronze material, good sealing characteristic, need to play with the standard line of tools and wire IDC.

■

3. Meet the ANSI / EIA 568A standard enhanced five categories measured in the smallest average 100MHZ.

■

Technical parameters:

NearCrosstalk:46.5dB

Attenuation: 0.17 dB

Return Loss: 28.4dB

Average: 42.0dB

Compressive strength; DC1000V/min not breakdown.

Rated voltage: Max 1.5A

Insulation resistance: 600Ω

Contact resistance: 10mΩ
